Setter Price Report

Price Analysis of Different Fund Strategies

The below data records the average of top prices across various alternative asset classes and time intervals. The average top price is generally derived from prices that Setter observed over the preceding 90 day period through actual bids or indications given by the over 1300 buyers covered by Setter.

Please note that Setter receives more prices from buyers for the more saleable funds (Setter Liquidity Rating of 'Good', 'Very Good' and 'Excellent'). Since these more saleable funds tend to price better than less saleable funds, average prices in this report may be biased towards higher priced funds. Also note that the funds priced in a given period will differ in vintage, geographic focus, etc. which can influence the average price for that period. Finally, certain strategies like cleantech and distress-credit are priced less frequently which in turn causes their average prices to be more variable

Source of Price Data

This report summarizes the individual top secondary market prices Setter Capital records over specific time periods based on actual bids and estimates derived from the over 1300 buyers it covers. See below for the number of funds priced in each period. Note that Setter receives more prices from buyers for the more saleable funds (Setter Liquidity Rating of 'Good', 'Very Good' and 'Excellent'). Since these more saleable funds tend to price better than less saleable funds, average prices in this report may be biased towards higher priced funds. Also note that the funds priced in each period will differ in average vintage, geographic focus, etc. which can influence average price for that period. Finally, certain strategies like cleantech and distress credit are priced less frequently which in turn causes the average prices recorded to be more variable.

Setter Price Report

Definitions

¹ Exposure: NAV + Undrawn

² Prime Buyers are buyers that are existing investors in the fund family, have it on their shortlist or have recently priced it. Other buyers, who have a general interest in buying this type of fund but not the fund specifically (“General Buyers”), are not included in the number of indicated prime buyers

³ The Setter Liquidity Rating (SLR) is a subjective measure of the relative liquidity of non-redeemable alternative investment funds and is not a measure of the investment merits or quality of a fund. The SLR and number of Prime Buyers² are determined by Setter Capital and rely in part on subjective assessments of: the seriousness, capacity and number of interested buyers for a fund; and the ease of transfer. The SLR and number of Prime Buyers² should not be relied upon to make any investment decision or to predict the future liquidity of a fund. Also, the SLR is not intended as a measure or indicator of the liquidity of a fund's underlying portfolio holdings. The SLR applies to an entire series of funds, or 'fund family', and individual funds within a fund family may be more or less illiquid than the SLR indicates. For instance, lightly funded funds or very old funds are often less liquid than funds that are greater than 30% funded or less than seven years old. Also, smaller interests and very large interests have fewer buyers with less liquidity. The liquidity of a fund and the SLR can change at any time, as demand for a fund family changes or transfer becomes more or less restrictive or Setter Capital re-evaluates or gains new insight into a fund's relative liquidity. See the article 'Setter Capital Liquidity Rating' for more details. The SLR is not provided as a service and Setter Capital, SecondaryLink and DiligenceLink therefore assume no responsibility for any losses alleged to be the result of the use of the SLR or for any purported reliance upon the rating. The SLR may be flawed and Setter Capital welcomes suggestions to improve its usefulness.
